

POZZTECH ENGINEERING

QUALITY POLICY

Pozztech Engineering aim to set new benchmarks and achieve project excellence through the implementation of a proven and robust Quality Management System certified to AS/NZS ISO 9001:2015

Pozztech strive for continual improvement, innovation and customer satisfaction by safely delivering projects on time, on budget and to applicable standards and requirements to consistently exceed customer expectations.

Our core values stem from a culture of quality, integrity, accountability and sustainability and are focused on the company being able to deliver high quality products and services to the subsea, oil & gas, agricultural, mining, processing and energy industries.

To fulfil this commitment, Pozztech shall:

- ✓ Set objectives and performance measures to ensure targets are achieved to improve our systems, processes and deliverables.
- ✓ Provide sufficient resources to implement, maintain and continually improve our Quality Management System.
- ✓ Encourage and embrace feedback from internal and external sources to further refine our objectives.
- ✓ Strive to attain technical excellence and superior performance in engineering and fabrication.
- ✓ Apply value added thinking, choose well and carefully consider the impact of our decisions.
- ✓ Manage the business to promote a culture of open communication, pride, safety, quality and integrity.
- ✓ Identify, investigate, action and disseminate all non-conformances to prevent further reoccurrence.
- ✓ Be transparent, ethical and accountable for our decisions and act in the long-term interests of all stakeholders.
- ✓ Promote positive relationships with Clients, employees and subcontractors to further ensure customer satisfaction.
- ✓ Challenge what we do and focus on achieving "right first time" to reduce waste, schedule impact and rework costs.
